Only The Top 40% of 2015 Born Bulls Sold

What a difference twelve months can make with Otago hill country having a season to remember for the right reason. With cows going into winter in great order and you as calf producers have been well rewarded in the last 12 months which is encouraging going forward.

The 2017 Sale Team is the most consistent mob we have presented both phenotypically and performance wise with strong emphasis on calving ease with growth and good carcase traits like IMF.

Strong beef prices continue and look exciting going forward.

Foreword

Limehills Herefords (previously Hill Springs) was established in 1974 by Tom Pannett and has been aiming to breed big sound free moving cattle that have the traditional Hereford traits of fertility and efficiency. This means we provide productive Bulls for your herd that are fully performance recorded and with predictable traits.

Since starting our annual sale in 1979, more top bulls have been introduced, among them the well performing "Strathavon Squire", "Braxton Banner 4", "Koanui Giant 117", "Hill Springs Riser 1st", "Hill Springs Deliverance 22", "Okawa Willis T98" and "Hill Springs Deliverance Q41" - now a 5-way trait leader. All these bulls are used with one aim in mind of enhancing the herd of cows that produces the bulls for sale. 2008 was a very exciting year for the Limehills herd. For the first time we sent a bull to Beef Expo and were very pleased the Limehills 655 was judged first and also made top prize for a bull in 2008 of \$40,000. Following that we had a very good Annual Sale with a Limehills 680 making \$26,000 and we sold 32 of 37 bulls.

In the last few years we have sourced the best bulls we can find that suit our programme and our customers' programmes have been added.

Wirunna, Echuca and heifer bull specialist, Monymust Captain and Okawa Bedford standouts along with Limehills Bulls Awesome 070901, Limehills Stamper with 429 and 462 the best breeder yet with sons this year and Limehills Stamper 120719 who is along with Limehills Erase 110442 the leading sires for 2017 Sale.

Our farming practice means we continue to breed sound cattle with substance and a strong constitution that thrive in all conditions. We have always selected for genetic fat as a risk management tool for females in tough seasons especially Rib Fat which also helps IMF.

Also for the 2017 calving season we have imported two very exciting sires for our, and your, futures with Injemira Anzac K220, a beautifully

put together well performed animal with great IMF and Carcase along with Calving Ease. Also we have imported a moderate American Bull called Sandhills 42X, top Carcase trait bull with attributes that will be well suited to New Zealand. Having inspected both these bulls I am excited to see the results from our AI program and small ET program this spring. Both these bulls came from strong programs that were very commercial in their aims.

The 2017 cow herd has increased and calf down 260 cows this year. We will still strive to produce functional cattle with great performance - without being extreme.

Our Bulls are naturally presented to shift into commercial conditions with our guarantee of satisfaction. We stand behind what we sell.

Please bring this catalogue to the sale

All bulls have been served ability tested.

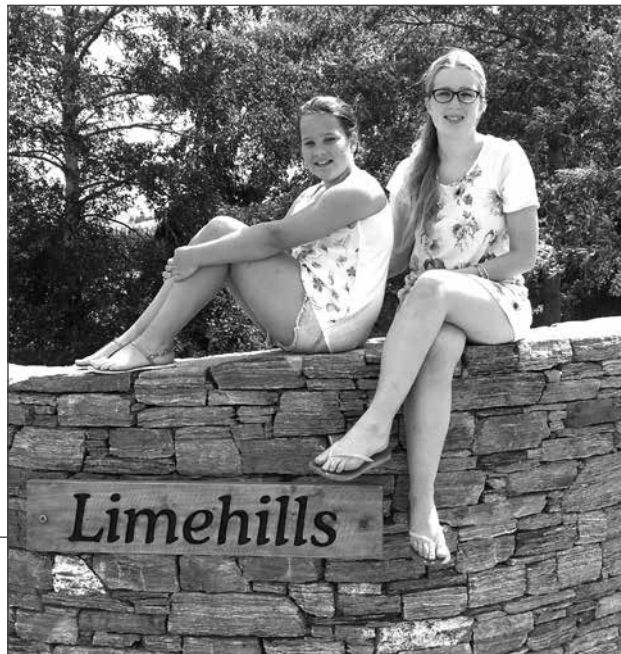

Testicle size now expressed as EBV.

All bulls measured for Scrotal Circumference Pre Sale.

All bulls muscle scanned.

All bulls muscle and IMF scanned for many years.

Next generation - Evie and Madison Pannett. As a family tradition the girls each select a lot at the sale and negotiate with Grey to get a small percentage of its price received at auction. This is in return for their help during the year. There is great excitement and competition each year.

Breedplan: EBV s Shorten the Odds

Breeders using the new breedplan system of performance recording use an Estimated Breeding Value (EBV) to rank animals on different traits.

Example:

	Group EBV's (kg)			
	200 Day Milk	200 Day (kg) Growth	400 Day (kg) Weight (Est)	600 Day (kg) Weight
	+1	+8	+14	+25

All bulls will have this information to help you with your sire selection depending on the goals you are looking to achieve. An EBV is based on an animal's own performance plus the performance of all known relative, sire, dam, half sisters, etc., as well as adjusting for environmental factors which effect actual growth rate. We have been fully performance recording since 1978 and this along with Breedplan we feel we can provide you with a detailed easy to understand aid in your Bull selection.

Explanation of Breedplan Figures

Breedplan is a performance recording system which uses an animal's own performance, plus the performance of all known relatives in the herd - sire, dam, half sisters and brothers etc.

Breedplan uses Estimated Breeding Values (EBV's) to rank animals for different traits.

EBV is "The Estimated Value of an Animal as a Parent" expressed in kilograms.

BIRTH WEIGHT indicates genetic potential for birth weight. Positive indicates high birth weight and negative indicates lower birth weight.

EBV 200 DAY MILK is a measure of the potential of that bull to transmit milking and mothering ability to its female progeny in your herd. Weaner producer should place emphasis on this and 200 Growth.

EBV 200 DAY GROWTH is a measure of that bull's potential to transmit pre-weaning growth to its progeny in your herd. Weaner producer should place emphasis on this and Milk EBV

EBV 400 DAY WEIGHT is a measure of that bull's potential to transmit growth from birth to yearling to its progeny in your herd.

EBV 600 DAY WEIGHT is a measure of that bull's potential to transmit growth from birth to maturity to its progeny in your herd. Heavy Steer and Bullock producers will be interested in 600 Day EBV

Breeding Policy - Why buy a Limehills Bull

1. Fertility — Selection pressure on tight calving and pregnancy testing and testicle size.
2. Most things that effect the profitability of your herd cannot be seen by eye.
3. Proven Superior Genetic ability.
4. Selecting from a large commercially run herd to keep selection pressure on.
5. You will be dealing directly with stud principal.
6. We are here to breed a cow herd that is sound, well framed, easy doing cattle that thrive and calve easily, are fertile, with strong performance. The Bulls are a result of this philosophy.
7. Satisfaction guaranteed.

2017 Hereford Breed Averages for All Recorded 2015 Drop Calves

Calving Ease (%)	Birth Weight (kg)	200 Day Weight (kg)	400 Day Weight (kg)	600 Day Weight (kg)	Mat Cow Wt (kg)	200 Day Milk (kg)	Scrotal Size (cm)	Carcase Weight (kg)	EMA (Sq.cm)	Rib (mm)	Rump (mm)	IMF (%)	HP	EM

Conditions Of Sale

The sale will be conducted under the rules and regulations of the Otago Stock Agents' and Woolbrokers Association as posted.

At the fall of the hammer each lot shall become the property of the purchaser, who will then take all responsibility.

Insurance: Purchasers are strongly advised to insure all cattle prior to transit. Bulls may be insured against 'loss of use' at additional rates.

Free delivery of all Bulls: South Island - To nearest saleyards.

North Island - To Christchurch.

All details in respect of cattle catalogued are believed to be correct, but the auctioneers who have compiled this catalogue do not take responsibility for errors or omissions.
